Speed Couriers the same-day courier brand of Speed Services Plc has the power to deliver

We concentrate on providing locally-based courier services through our network of regional offices. We specialise on reducing our customers' internal administrative costs and we work for some of the UK's most successful PLCs from all business sectors.

Our in-house networked computer system is the best in the industry, allowing us to provide our offices and our clients with real-time information. "Proof of Delivery as it happens"

We now can offer our major clients on-line bookings and stock details, as well as many other management information summaries and reports.

Speed offers four logistics services: Same-day couriers, Component logistics, Technical swap-outs and Next-day delivery all of which can be combined into a tailored logistics solution to suit your needs.

Same-day Couriers

We pick up *immediately*, by bike or van, and *go straight there!*

Next-day Couriers

For the overnight parcel industry, we are often the final link in the delivery chain into their traditionally unprofitable areas of low population density. We make short work of their otherwise unviable parts of the UK. We can also now offer premium delivery by specified times.

Technical Swap-Outs

We visit our clients' customers at home or at work, and swap faulty equipment for a working replacement

speed

"delivering the promise"

Airspeed International

If you need something to go outside the UK, we can also help you out. With competitive tariffs and door to door service to most world-wide destinations.

Component Logistics

We store parts locally at our premises for immediate delivery to our clients' Field Engineers to help them become more productive
